About Zephyr Minerals Ltd.

Zephyr Minerals Ltd. continues to advance its 100% owned high grade Dawson-Green Mountain Project in Colorado, USA. After expanding its land package to 1,385 hectares (3,430 acres) the Company now controls a 12.2 km long Dawson-Green Mountain mineralized trend. The central 3.2 km long El Plomo section is the focus for potential Broken Hill Type silver-lead-zinc mineralization and the east and west sections, Dawson and Green Mountain respectively are being targeted for gold. The Dawson section is currently host to a high grade inferred gold resource. The Company believes the combined Dawson and Green Mountain sections encompassing approximately 9 km of mineralized trend provide excellent resource expansion potential.
