News Release No. 11-20  
August 12, 2020

## ZEPHYR ACCELERATES WARRANT EXPIRY DATE

August 12, 2020 HALIFAX, NOVA SCOTIA – Zephyr Minerals Ltd. (TSXV: ZFR) ("**Zephyr**" or the "**Company**") announces that the Company has accelerated the expiry date of the common share purchase warrants of Zephyr issued on February 20, 2020 (the "**Warrants**") in accordance with the terms of the Warrants. Approximately 5.1 million Warrants are currently outstanding and are subject to the acceleration. If all outstanding Warrants are exercised, gross proceeds to the Company will total \$1,785,000.

Under the terms of the Warrants, the Company is permitted to accelerate the expiry date if the volume-weighted average trading price of Zephyr's common shares on the TSX Venture Exchange for any 20 consecutive trading day period is greater than \$0.70 (the "**Acceleration Event**"). Zephyr is pleased to confirm that an Acceleration Event occurred as of August 11, 2020. Accordingly, the Company has chosen to accelerate the expiry date of the Warrants to September 11, 2020 and this news release constitutes notice to the Warrant holders of the acceleration under the terms of the Warrants. Holders may exercise the Warrants before 5:00 p.m. Halifax Time on September 11, 2020 (the "**Expiry Time**") by observing the process as set out in their Warrant certificates. All Warrants remaining unexercised after the Expiry Time will be cancelled.

### About Zephyr Minerals Ltd.

Zephyr Minerals Ltd. continues to advance its 100% owned high grade Dawson-Green Mountain Project in Colorado, USA. After expanding its land package to 1,385 hectares (3,430 acres) the Company now controls a 12.2 km long Dawson-Green Mountain mineralized trend. The central 3.2 km long El Plomo section is the focus for potential Broken Hill Type silver-lead-zinc mineralization and the east and west sections, Dawson and Green Mountain respectively are being targeted for gold. The Dawson section is currently host to a high grade inferred gold resource. The Company believes the combined Dawson and Green Mountain sections encompassing approximately 9 km of mineralized trend provide excellent resource expansion potential.
